

News from Saab 11 October 2023

## Saab to demonstrate defence innovations at ADEX 2023

Saab, a leading defence and security company, is set to showcase a range of the advanced solutions and technological prowess at Seoul ADEX 2023, which takes place at Seoul Airport, Korea from 17 to 22 October, at booth C505.

The product offerings Saab will display at the show represent decades of innovation, including GlobalEye a multi-domain Airborne Early Warning & Control (AEW&C) solution; state-of-the-art electronic warfare solutions; the Giraffe 1X compact high-performance lightweight 3D radar; ground combat systems such as Carl-Gustaf® M4, AT4, and NLAW; training & simulation offerings; and the AUV62-AT anti-submarine warfare training system.

As a highlight, Saab will be displaying GlobalEye - a solution that is a product of Saab's long heritage in AEW&C with a history of more than 30 years. GlobalEye is the most modern and capable airborne surveillance solution available on the market today. With its mix of modern active and passive sensors, it provides long-range early detection and identification of objects in the air, at sea and over land from a single platform.

"As a company we are thrilled to demonstrate our wide portfolio of cutting-edge technologies and solutions at Seoul ADEX 2023 in Korea, which is a key market for Saab," commented Mr Henrik Lönn, Head of Saab Korea. "We look forward to visitors at our stand having the opportunity to learn how Saab supports our customers to enhance their capabilities, which are required to dominate the battlefield in increasingly challenging threat environments."

Saab will hold a media briefing with a focus on Saab's offer for the Airborne Early Warning & Control II programme with GlobalEye.

GlobalEye – enhancing ROK's AEW&C capability

When: October 18<sup>th</sup> – 10am

Where: Media Conference Room
