

**SAAB**

# EMBRAER **SUPPORT SOLUTIONS**

Saab's comprehensive experience in component maintenance meets the demands of the Embraer ERJ 135/145 family. Securing its prime position in support solutions, Saab extends its capabilities to cater for the developing Embraer family, offering extensive Maintenance Repair and Overhaul (MRO) component services for the 170/190 aircraft. Saab delivers a reliable and efficient MRO service, ensuring optimal, cost-effective operation of all equipment.

# SAAB

## FLEXIBLE SOLUTIONS

With Saab at your side, you have access to a high quality support solution that can be customised and adapted to improve aircraft availability and reduce costs. Our support services are based on close and efficient communication. With a dedicated team of personnel immediately available to deal with every request, Saab has the capability and flexibility to match specific component maintenance requirements, either in the workshop or in the field.

Our component maintenance services are offered worldwide across the market and are supported by logistics and transport services, field services and component engineering services.

## SHORT TURNAROUND TIME

Using high precision repair facilities, Saab offers flexible and tailored component MRO solutions and composite repairs to meet specific needs and requirements with a short turnaround time.

## COMPONENT SUPPLY SERVICES

Our component supply service options range from rental and single item exchange, to extensive supply programmes for agreed component packages. Using the highly efficient component supply services, Saab's partners can quickly secure spare components and reduce the cost of stocking standby parts.

## ENGINEERING SERVICES

Saab has a wealth of experience in supplying components used in different environments and operational conditions. As part of its engineering support, Saab offers an essential service for aircraft operators. This includes surveillance of component systems for flight safety, reliability and economic impact, evaluation and recommendation of modifications, technical analysis and investigations for optimal operation.

## LOGISTICS SERVICES

Saab's forwarding specialists are dedicated to developing customised transport concepts to facilitate quick, reliable and cost-efficient transportation of components between the customer and the workshop.

## FIELD SERVICES

Field service teams are available at short notice to assist customers with repairs on items such as landing gears during overnight stops or other planned groundings.

### SAAB'S MAINTENANCE SERVICE INCLUDES:

- Instruments
- Avionics
- Hydraulics
- Pneumatics
- Fuel
- Power supply
- Environmental control
- Oxygen
- Fire extinguishing
- Auxiliary power units
- Landing gear
- Composite and sheet metal structures

## CERTIFICATES

We are accredited by several civil authorities and have a wide range of certificates, including EASA 145, FAA 145, TCCA, CAAC, ISO 9001 and ISO 14001.
