Saab Delivers the First GlobalEye

Saab delivered the first GlobalEye Swing Role Surveillance System aircraft to the United Arab Emirates on 29 April 2020.

The United Arab Emirates has ordered three GlobalEye aircraft, with the initial contract signed in late 2015. In November 2019 the country also announced its intention to complete a contract amendment for the purchase of an additional two systems.

“The delivery of the first GlobalEye is a major milestone for Saab, but also an important step in the history of airborne early warning and control. We have set a new standard for the market and I am proud to say that we have delivered the most advanced airborne surveillance solution in the world to the United Arab Emirates”, says Micael Johansson, President and CEO of Saab.

GlobalEye is Saab’s new airborne early warning and control solution. It provides air, maritime and ground surveillance in a single solution. GlobalEye combines Saab’s new Erieye Extended Range Radar and a range of additional advanced sensors with the ultra-long range Global 6000 aircraft from Bombardier.
