Saab receives order for sight- and fire control capability for CV90

Saab has received an order from BAE Systems Hägglunds for sight- and fire control capability for the CV90 combat vehicle. The order value is approximately SEK 970 million and the contract period is 2023-2029.

Saab will provide the sight- and fire control capability for the BAE Systems' CV90 ordered by the Czech Republic earlier in 2023 and will carry out the work in Sweden and the Czech Republic.

In May 2023 Saab received an order from BAE Systems Hägglunds for sight- and fire control capability for Slovakia's CV90 combat vehicles.

"The new order further underlines our great collaboration with BAE Systems Hägglunds as well as our ability to scale up production," says Carl-Johan Bergholm, head of Saab's business area Surveillance.

Saab's sight- and fire control capability for tanks and combat vehicles provides high hit probability against ground and air targets, regardless of the vehicle's movements.

Saab is a leading defence and security company with an enduring mission, to help nations keep their people and society safe. Empowered by its 20,000 talented people, Saab constantly pushes the boundaries of technology to create a safer, more sustainable and more equitable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
