## Saab receives order from Sweden for Giraffe 1X surface radar

Saab has received an order from the Swedish Defence Materiel Administration (FMV) for the Giraffe 1X radar for one of Sweden's Ground Based Air Defence (GBAD) solutions. The contract period is 2024-2027 and the order value is approximately SEK 700 million.

The order includes Saab's Giraffe 1X radar, associated command and control systems and integration to a Swedish GBAD solution. The radar will be installed on a Sisu GTP armoured vehicle.

"I am proud that Sweden chooses to integrate our versatile surface radar Giraffe 1X as a part of its ground based air defence. Our solution will contribute to strengthening Sweden's ground based air defence capability and to protecting the forces with advanced capability to detect and identify threats while on the battlefield," says Carl-Johan Bergholm, head of Saab's business area Surveillance.

Giraffe 1X provides commanders with quality air defence target data, drone detection for counter-UAS, and sense and warn capability simultaneously for rockets, artillery and mortars. Giraffe 1X also offers continuous software upgrades in order to meet emerging threats.

*Saab is a leading defence and security company with an enduring mission, to help nations keep their people and society safe. Empowered by its 22,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.*
