Saab receives order for Air Command and Control System

Saab has received an order from a NATO country for its air command and control system 9AIR C4I. The contract value is approximately 250 MSEK. Deliveries will start in 2025. The order was booked in Q4 2024.

Saab's 9AIR allows the user to control the air and space domain. Its offer includes the 9AIR C4I system, which provides flexibility and scalability for managing weapons, sensors, and communications in air and space operations. Saab's 9AIR portfolio also features the 9AIR Trainer, enabling effective operator training on advanced C4I systems, and the 9CCIS, designed for efficient planning, resource management, assessment, and evaluation.

"This order highlights the competitiveness of our 9AIR product portfolio and will further contribute to NATO's capabilities. Our advanced Air Command and Control System delivers support planning, tasking and control across the entire breadth of possible missions and scenarios," says Carl-Johan Bergholm, head of Saab's business area Surveillance.

C4I = Command, Control, Communication, Computer, Intelligence

CCIS = Command and Control Information Systems

Saab is a leading defence and security company with an enduring mission, to help nations keep their people and society safe. Empowered by its 24,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
