## Saab receives order for TAURUS KEPD 350 sub-components

Saab has received an order for maintenance and modernisation of the cruise missile TAURUS KEPD 350. The order value is SEK 1.7 billion and the contract period is 2025-2035.

The order includes significant system upgrades and modernisation to the German Air Force's TAURUS missiles as well as a ten-year life cycle maintenance.

Saab received the order from the German prime contractor TAURUS Systems, a joint venture between MBDA Germany and Saab. The initial order was placed by Germany's defence procurement office (BAAINBw) to TAURUS Systems.

"TAURUS KEPD 350 enables the user to defeat targets at long ranges required for the most demanding air operations. The latest upgrades will provide the German Air Force with significant improvements," says Görgen Johansson, Head of Saab's business area Dynamics.

TAURUS KEPD 350 is an air-launched cruise missile with a range of more than 500 km used to defeat static ground-based targets.

*Saab is a leading defence and security company with an enduring mission, to help nations keep their people and society safe.
