Saab receives order for UTAAS sight- and fire control system

Saab has received an order for the Universal Tank and Anti-Aircraft System (UTAAS) sight- and fire control system for Combat Vehicle 90 (CV90) from BAE Systems Hägglunds. The order amounts to SEK 880 million and was booked in the first quarter 2025.

“UTAAS is a versatile sight and fire control system for tanks and combat vehicles. It provides high hit probability against all ground targets, as well as helicopters and high-speed aircraft. This is a much-desired capability by armed forces worldwide, says Carl-Johan Bergholm, Head of Saab’s business area Surveillance.

Saab has, in collaboration with partners, established production in Europe to meet the growing demand for UTAAS.

UTAAS is used for both aerial and land targets and is based on a modular construction with an integrated sight- and fire control system for the CV90.

Saab is a leading defence and security company with an enduring mission, to help nations keep their people and society safe. Empowered by its 25,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
