

ASDA 2025

Invitation

8 – 10 April | Arena Zagreb

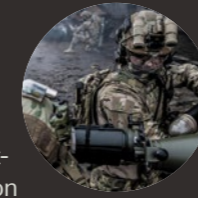

Stand
2029

Keeping people and society safe

In today's complex world, Saab's thinking edge provides the innovative and advanced technical solutions for the modern battlefield, to secure your operations. Saab continuously develops, adapts and improves new technology to meet customers' changing needs. Join us at ASDA 2025 to learn about Saab's offerings and discover how our extensive portfolio provides forces with a tactical advantage against any threat.

Ground Combat Preparing forces for tomorrow's threats

The Carl-Gustaf® M4 system, is a man-portable, multi-role weapon system with a wide range of ammunition types, making it suitable for a variety of tasks. The best-in-class NLAW Next Generation Anti-Tank Weapon effectively eliminates even the most advanced tanks, including in built-up areas. Combat-proven across the world, the AT4 support weapons are light-weight, single-shot, and fully disposable.

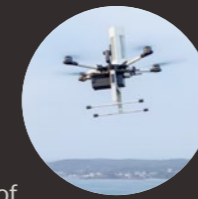

Ground Combat Trainers The frontline of modern training

Efficient training is key for operational capability and effect. Saab will showcase Live and Virtual training, including the simulation system. We will provide opportunities to test and try the Training Systems supporting Ground Combat Weapon Systems. The solutions include highly realistic Indoor and Outdoor Trainers for Carl-Gustaf® M4, AT4, and NLAW.

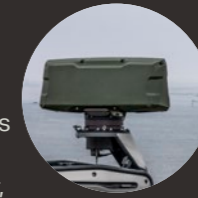

Sirius Compact Broaden your sensing horizon

The Sirius Compact is a modular, scalable, and portable system of passive sensors capable of detecting electromagnetic emissions. Due to its low Size, Weight and Power, it can be mounted on a multitude of platforms including drones, vehicles, vessels and masts. At ASDA we will showcase Sirius Compact drone solution, demonstrating its advanced capabilities in detecting electromagnetic emissions while mounted on a light and versatile UAV platform.

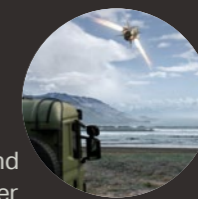

Giraffe 1X Creating time to act

The Giraffe 1X multi-mission radar protects forces, secures their freedom of maneuver, and supports air superiority. The high-resolution 3D radar Giraffe 1X enables the detection of stationary and rotary-wing targets, high-speed missiles, RAM targets, and small UAVs in highly cluttered environments.

RBS15 Engage from air, sea and land

The RBS15 Mk3 has an incredible range and exceptional all-weather active radar target seeker. The multi-purpose missile has a flexible trajectory of over 200 km, advanced decision support and smart autonomous technology, enabling it to hit the target from any area. The RBS15 can be integrated with existing infrastructure to meet coastal defence requirements. Saab will display the RBS15 Mk3 anti-ship missile integrated into a launcher module mounted on a truck, enhancing capability against naval targets.

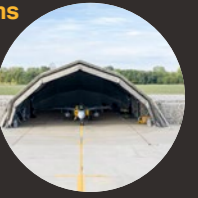

GLSDB Long range fires capability

Ground-Launched Small Diameter Bomb GLSDB is a long-range precision munition that meets the evolving needs of armed forces. At the Live Firing Show, Saab will display the containerized solution of the GLSDB, that can be placed on any vehicle or deployed on its own.

Mobile Hangar Solutions Multispectral protection

Saab's Deployable Maintenance Facility provides troops with a comprehensive mobile maintenance capability, which increases operational readiness. The solution is modular and ready for use in less than 48 hours, suitable for any topographical and climatic zone with maximum operational flexibility.

TactiGuard XD Adapts to any environment

TactiGuard XD is a Common Criteria certified Cross Domain Solution enabling secure information sharing between higher classified up to secret and lower classified or unclassified systems. TactiGuard offers broad utility, being adaptable for use across land, air, and naval domains.

LMV Basic Design Reliable with multi-purpose capabilities

The Littoral Mission Vessel LMV is a modern, versatile and modular platform designed for a wide range of missions. Its highly configurable design and advanced combat systems make it an ideal Patrol Corvette for safeguarding maritime security and protecting vital sea lines of communication.
