SIGNIFICANT, our team of world-leading organisations in military deployable healthcare. Together, we will deliver and support an end-to-end deployable, scalable and modular military healthcare capability.

Our medical technology and globally recognised clinical competence will help you achieve your long-term deployable health objectives.

Together we will provide an unparalleled support network. Leveraging the Southern Hemisphere footprint and experience of Broadspectrum delivering high levels of availability for military equipment, we can ensure all units have the support they need, when and where they need it. To achieve this, we build special support networks providing integrated support solutions to Australian and where needed. This will provide a level of service that will ensure the user units maintain the highest levels of availability and clinical capability, to support the health and wellbeing of ADF personnel in the field or on operations.

Together, we have created an Australian team combining the strengths of five world-leading organisations in military deployable healthcare. Through a long-term innovative and collaborative partnership, we will deliver and support an end-to-end deployable, scalable and modular military healthcare capability.

GLOBAL EXPERIENCE
ADVANCED CAPABILITY

We have a proven capacity to work with governments and health organisations to provide clinical health care delivery and support under demanding mass casualty scenarios. This enables us to establish long term strategic partnerships with our customers.

DELIVERING AUSTRALIA’S MOST COMPREHENSIVE ROLE 1, 2 AND 3 DEPLOYABLE HEALTH CAPABILITY.

TECHNOLOGY
SUPERIORITY

The Saab-led team will deliver innovative and cost-effective solutions that are technologically superior and are designed specifically for the deployed environment. It is our mission that the standard of health care and clinical outcomes in the deployed environment will be of the same order of magnitude as you would receive at home.

LET THE FACTS DO THE TALKING

**SAAB**

- Providing deployable healthcare solutions for over 50 years.

**Broadspectrum**

- Specialist partner for the ADF for more than 20 years in the delivery of combat asset maintenance and sustainment.
- Leading advocate for Indigenous peoples.
- Backed globally by Ferrovial, one of the world’s largest infrastructure companies.

GLOBAL EXPERIENCE
ADVANCED CAPABILITY

Together we have successfully delivered deployable health programs in the US, UK, Europe, Africa, Australia and New Zealand with proven track record of effective delivery, scalability and operational excellence. Strong relationships have been formed with the Australian Defence Force, which ensures the Australian Defence Force is provided with the necessary deployable health care capability to support operations in the world.

We will maximise Australian industry involvement. This includes use of local manufacturing, delivery and support. Global deployments will be supported via existing team supply chains. This allows us to meet contract lead time requirements, optimise the required capability outcomes and ensure the required health care capability is available when and where it is required.

We will establish a Centre of Excellence in Australia for delivering deployable health care capabilities throughout the world.

MEDICAL
SOLUTIONS
ACROSS THE
MILITARY CARE CONTINUUM

SOLUTION
FOCUSED DESIGN
